

DESOGERME™ MICROCHOC+

How does DESOGERME™ MICROCHOC+ works?

DESOGERME MICROCHOC+ is one of the most powerful disinfectant on the market: It is bactericidal, fungicidal and virucidal from the dosis of 0,8%.

DESOGERME MICROCHOC+ has been tested against endoparasites responsible for the Coccidiose and for the Cryptosporidiose, at the dosis of 4% during 4h.

How to use DESOGERME MICROCHOC+ ?

You can use DESOGERME MICROCHOC+ during the sanitary vaccum or in presence of animals :

1. Clean with a foaming detergent like AXIS HYGIENET at 5% or AXIS NETMOUSSE.
2. Rinse.
3. Disinfect with DESOGERME MICROCHOC+ at the dosis of 4% (do not rinse).

Unlike other products, it is not necessary to proceed with a first disinfection before to apply DESOGERME MICROCHOC+. You can apply it just after the cleaning stage to obtain an action against the endoparasites like coccidiosis, as well as against bacterias (E.Coli, Salmonelles...), and Fungus (Aspergillus...) and the Viruses (Talfan, Newcastle, Gomboro...).
